Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python
Frontend: React, Next.js, Svelte, HTML5, CSS3, Tailwind CSS, Material UI, Radix UI, shadcn/ui
State & Routing: Redux, TanStack Query, TanStack Router, React Router, Next.js App Router
Engineering: Microfrontends, Component Libraries, Performance Optimization, Code Splitting, Lazy Loading, SEO
Tools: Git, Vite, Webpack, Turborepo, Storybook, Docusaurus, Figma, CI/CD

Professional Experience

Software Engineer II (Frontend) *Apr 2025 – Present*
Deloitte

- Led frontend development across three enterprise products (ROI Calculator, Value Tracking, and Strategy & Value Mapper) within Deloitte's Energy & Retail Industry practice, collaborating with product managers and enterprise stakeholders from requirements through production delivery.
- Designed and developed a financial planning platform supporting dynamic investment modeling with real-time ROI, NPV, IRR, payback period, project cost, and projected benefit calculations using React, TypeScript, Redux, TanStack Query, and Recharts.
- Developed 50+ production screens and 50+ reusable React components within a Microfrontend architecture, establishing a shared UI foundation across multiple enterprise applications.
- Integrated 200+ REST APIs while implementing Microsoft SSO, JWT authentication, cookie-based authorization, and efficient asynchronous data management using TanStack Query.
- Improved application maintainability and performance through reusable component patterns, conditional rendering, route-level code splitting, lazy loading, virtualization, React.memo, useMemo, useCallback, and systematic frontend refactoring.
- Mentored three frontend engineers, reviewed pull requests, and contributed to engineering standards across applications supporting 500+ business users.

Software Engineer II - Frontend *Jul 2024 – Mar 2025*
Orufy Technologies

- Led frontend development across multiple SaaS products using React and TypeScript, collaborating directly with founders, designers, and backend engineers.
- Built a drag-and-drop chatbot journey builder using React Flow, enabling non-technical users to configure complex conversational workflows visually.
- Developed a configurable booking platform with dynamic forms, conditional workflows, and real-time previews for customizable business onboarding.
- Introduced Storybook and established a shared component library, improving design consistency and reducing duplicate frontend implementation.
- Optimized frontend performance through code splitting, tree shaking, lazy loading, and bundle optimization techniques.
- Mentored frontend developers through pull request reviews, architecture discussions, and engineering best practices.

Frontend Engineer *Nov 2023 – June 2024*
FlatHalt Technologies

- Architected and built a multi-tenant property rental platform and its enterprise admin panel from scratch as the sole frontend owner, handling the complete frontend lifecycle from greenfield setup to production.
- Designed scalable state management, tenant-isolated routing, and high-performance UI components using React and TypeScript, supporting 5,000+ active users with zero cross-tenant state pollution.
- Spearheaded performance optimization and component design standards, reducing initial page load times and streamlining UI maintenance across complex administrative dashboards.

Frontend Engineer *Jan 2022 – Oct 2023*
Shorea Softtech

- Developed a mobile-first e-commerce platform processing 10,000+ monthly orders with a strong focus on responsive UI, SEO, and performance.
- Built interactive analytics dashboards using React and Chart.js, enabling Sales and Finance teams to monitor business KPIs through real-time visualizations.
- Contributed to a React Native application used by 50,000+ users by delivering customer-facing features including Refer & Earn and Digital Wallet.

Open Source

Creator & Maintainer
Reactuals (GitHub) | Documentation

- Built and maintain an open-source React utility library providing 55+ reusable React hooks for state persistence, browser APIs, local storage, and frontend productivity.
- Designed comprehensive documentation with Docusaurus and authored interactive examples for every hook, improving developer onboarding and API discoverability.

Education

Mansarovar Global University *2023*
Bachelor of Technology (Computer Science & Engineering)
